

## Information Security Policy

### ***General statement of policy***

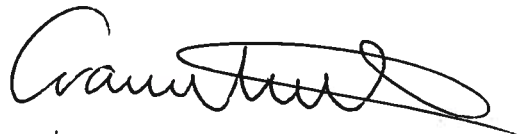

Alpha Response shall:

- Establish, maintain and follow systems that identify and control risks to the security of information held by Alpha Response in whatever form.
- These systems shall take into account both legal requirements and specific requirements of clients.
- The systems will include the formal assessment of risk to a methodology which is appropriate for the information, its format and transfer methods between Alpha Response and the client.
- Establish objectives by which effectiveness and improvements may be measured.
- Establish feedback systems to measure the performance of Alpha Response against these objectives. In addition, periodic audits will be carried out.
- Learn from both the positive and negative outcomes of this measurement process, making improvements where appropriate.
- Develop our internal resources and work with our key trading partners to develop theirs.
- Continually improve the information security management system.

In order to ensure the achievement of the above commitments, Alpha Response has implemented an information security management system which satisfies the requirements of ISO 27001:2013.

This policy shall be reviewed by a Director at least annually and recorded on 6.4 frmA.

Signed

Managing Director

Date 25/8/22
